

Workshop on Sustainable Water Management for Industry

Discussion topics: Concentrate Streams - Water and Energy

The Pilot Advisory Group 'Sustainable Water Management for Industry', one of the pilot panels of the European Technology Platform for Water (WssTP) organizes on April 23 and 24, 2008 two workshops on the themes 'Concentrates' and 'Water and Energy'. By closing the water cycle in industry the problem of concentrated streams strongly increases. Energy is one of the main topics in sustainable water management in Industry, not only in relation to the energy use and costs of treatment technologies, but also the integration of energy and water in systems and processes is one of the most important point of attention in Sustainable Production.

In the regional process of the *World Water Forum*, which is currently in action as preparation for the WWF congress in Istanbul (www.worldwaterforum5.org), Water and Energy is also one of the topics already placed on the agenda.

The workshops are organized on April 23 and 24, 2008 in Bruges Belgium, in parallel of the I-SUP2008 conference.
